

# PARTICIPANTS NEEDED For a Research Study on Hives and Menopause

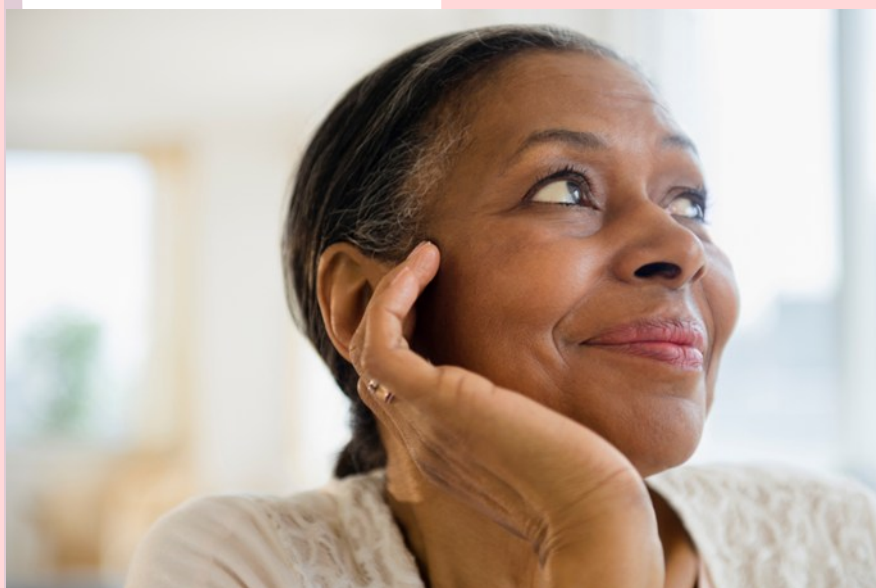

We are looking for women aged 45 and above to participate in a cross-sectional study. Our goal is to determine the prevalence of hives in perimenopausal and menopausal women.

## Interested?

All women over the age of 45 are eligible.

Participate by completing our 5-minute survey using the QR Code or complete a paper survey at the Allergy, Immunology & Immunizations front desk.

All participation is voluntary with no financial compensation.
